ISAAC Jarvis - URL Grading

Description:

Looking for your next online job? We are hiring!

We are currently looking for long-term participants for our new project, JARVIS, for which you will grade URL online in English (Australia)

Your job will be to grade how useful and precise users' queries are and classify the best results according to their accuracy. It's that simple!

The purpose of this project is the improvement of search engines, so they can offer more accurate results based on what users are looking for and the words they use to find it.

This will be of your interest if:

- You are a native speaker of English (Australia) and are currently based in Australia.
- Alternatively, you are a fluent speaker who has been living in Australia for at least 5 years. The online queries can be very local and related to culture, slang and lingo of the country. Therefore, being familiar with these terms is paramount.
- You can commit to at least 20 hours a week. The schedule is very flexible, but we ask for a minimum of 20 hours. There is no top limit of hours.
- You are interested in a long-term engagement. We expect this project to last at least until the end of the year, with a very probable extension afterwards.

Upon registration, you will be prompted to take a small survey and certification. Hurry up! The project is scheduled to start mid-May and the places are very limited per language and locale!

OneForma is part of Pactera EDGE, a global digital and technology services company. We bring together data, intelligence, and experiences to deliver human-centric solutions to complex business challenges.

If you are interested, please email [dgs\\_recruitment\\_jat@pacteraedge.com](mailto:dgs_recruitment_jat@pacteraedge.com)

**Payment:** This project is paid per hit. You can earn an average of 11.50 USD per hour! (Rate per hit varies from \$0.048 to \$0.383 depending on the tasks).
